### ABOUT ME

A graduate of Politeknik Negeri Semarang, majoring in instrumentation and control systems, with a strong interest in research and development. Has hands-on experience as an intern at PT Cakrawala Sakti Kencana in the engineering division and at CV Sarana Cipta Media in the R&D division. Skilled in system analysis, testing, and troubleshooting of technical systems. Known for being systematic, detail-oriented, and an effective team player in solving technical problems.

---

### WORK EXPERIENCES

#### Engineering Division

##### PT. Cakrawala Sakti Kencana | July 2020 – December 2020

- Recorded and collected electrical energy consumption data using KWh meters for monitoring and evaluation purposes
- Involved in troubleshooting, maintenance, and repair of generators and air conditioning systems to ensure optimal equipment performance

#### Research and Development Division

##### CV. Sarana Cipta Media | September 2025 - December 2025

- Conducted research and development of technology-based products
- Performed testing and analysis of experimental results

---

### EDUCATION

#### Diploma III - Electronics Engineering

Semarang State Polytechnic 2023 - 2026  
GPA : 3,60/ 4.00

#### Electronics Engineering

SMK N 4 Semarang 2020 - 2023

---

### PROJECT EXPERIENCE

#### Digital Communication Trainer - CV. Sarana Cipta Media

- Designed and tested a digital communication trainer based on electronic circuits for vocational school learning media

#### Water Level Monitoring System (HC-SR04 & A02YYUW UART) - Politeknik Negeri Semarang ((Course Project: Instrumentation)

- Designed a water level monitoring system using ultrasonic sensors and performed data processing and analysis

---

### SKILL

|                       |                                                                                                                                                       |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Soft Skill</b>     | Teamwork, good communication, high attention to detail                                                                                                |
| <b>Hard Skill</b>     | Maintenance and troubleshooting of electronic and instrumentation systems, microcontroller programming (Arduino), electronic circuit schematic design |
| <b>Software Skill</b> | Microsoft Word, Microsoft Excel, Proteus, Arduino IDE, CX-Designer                                                                                    |
| <b>Languages</b>      | Indonesia ( Excellent ) , English ( Intermediate )                                                                                                    |
